

# IDEMIA Group S.A.S.

The revised Outlook on IDEMIA Group S.A.S.'s Issuer Default Rating (IDR) reflects Fitch Ratings' expectation that the company's funds from operations (FFO) gross leverage will remain above its downgrade threshold of 7.0x in 2020-2021. IDEMIA's performance was under pressure in 2020 due to coronavirus pandemic-related restrictions and an overall slowdown of activities by government bodies and corporations.

Fitch expects a healthy recovery in revenue and EBITDA from 2021, albeit not sufficient to reduce leverage to below 7.0x in 2021. Revenue prospects are supported by a strong order book, but we see less visibility over the pace of the EBITDA margin improvement from 2022. We also expect IDEMIA's free cash flow (FCF) to turn positive only in 2022 compared with our previous expectation for 2020. This will be supported by improving EBITDA, lower restructuring costs and working capital and capex normalisation.

The ratings are supported by IDEMIA's strong global market positions in identification, authentication, payment and connectivity solutions. High leverage is the main constraint for the rating and the company's ability to reduce it organically with stronger EBITDA and FCF will be key for the ratings.

## **Key Rating Drivers**

**COVID-19 Impact Contained:** The pandemic and associated lockdowns had an adverse impact on some of IDEMIA's segments, particularly around identification solutions related to travel (Transportation Security Administration PreCheck) and those requiring the physical presence of customers (identification documents and enrollments).

IDEMIA was able to contain the negative impact due to its timely reaction and good geographical and business diversification. As a result, revenue declined only 2.8% yoy in 9M20 on a like-for-like basis. Revenue in government solutions (GS) declined 5.7% yoy while secured enterprise transactions (SET) demonstrated better resilience with flat revenues for the same period.

**EBITDA Under Pressure:** IDEMIA's 15% yoy EBITDA decline in 9M20 led to a spike in FFO gross leverage to 9.1x. Deleveraging below the downgrade threshold of 7.0x depends on continuing improvement of revenues and the success of the company's efforts in sustaining profitability. We project its Fitch-defined EBITDA margin to improve to historical levels of 15%-16% in 2022-2023 from an estimated 12.5% in 2020. We have limited visibility on EBITDA development post-2021 and the evolving pandemic remains an uncertainty that also may delay recovery.

Healthy Backlog: We expect a recovery in revenue in 2021 following improved performance in 3Q20 and, in particular, positive momentum in the GS segment after it was hit hard in 1H20. IDEMIA had a healthy order backlog at end-3Q20, which was 5% lower than at end-2019 but 8% higher than at end-2Q20 and 12% higher than at end-3Q19.

We expect further improvement towards end-2020. IDEMIA and its customers have adapted to social distancing and other restrictions and we expect that the impact of COVID-19 will be less pronounced in 2021 than in 1H20, even if the pandemic worsens.

**Decreased Non-Recurring Costs:** We expect non-recurring costs to fall to around EUR40 million in 2020 and EUR20 million in 2021 from EUR74 million in 2019 and EUR100 million in 2018. We treat a portion of 2020 one-off costs and all 2021 one-offs costs related to

Tiffany Ng +49 69 768076 159 tiffany.ng@fitchratings.com

Slava Bunkov +7 495 956 9931 slava.bunkov@fitchratings.com

transformation and cost-cutting projects as recurring and include them in EBITDA. This is because we see them as part of IDEMIA's continuing efforts to improve operational efficiency.

**Positive FCF Likely in 2022:** We expect IDEMIA to start generating moderately positive FCF from 2022. The main drivers will be revenue growth, EBITDA margin improvement, stable capex and a lack of large non-recurring expenses, which were the main drag on FCF in 2017-2019. We expect capex to normalise at around 8% of revenues in 2021-2023.

**COVID Long-Term Impact:** The current crisis highlights the importance of data digitalisation, identity management, facial recognition, traffic control and other technologies for government bodies and corporates alike. With its strong market shares in key sectors, IDEMIA is well-positioned to benefit from rising demand for these technologies in the long term. Slow adoption of innovative products by customers is a main challenge for the industry rather than technological risk, in our view.

## **Financial Summary**

(EURm)	Dec 18	Dec 19	Dec 20F	Dec 21F
Gross revenue	2,156	2,339	2,211	2,320

## **Rating Derivation Relative to Peers**

IDEMIA's technology peers, such as Nokia Corporation (BBB-/Stable), Telefonaktiebolaget LM Ericsson (BBB-/Stable) and STMicroelectronics N.V. (BBB/Stable), are rated in the investment-grade category. Despite higher volatility in both revenue and margins than IDEMIA, they have greater scale and stronger cash flows as well as no or very low net leverage.

While IDEMIA has a strong business position and technology leadership within its chosen markets, its smaller scale and high leverage place its rating in the 'B' category. Higher-rated financial technology (fintech) companies such as Nets Topco Lux 3 Sarl (Nets; B+/Rating Watch Positive, or RWP) and Nexi S.p.A. (BB-/RWP) benefit from leadership in their markets, strong growth prospects and healthy cash flow generation. Similarly rated European software companies such as Dedalus SpA (B/Stable) and TeamSystem Holding S.p.A (B/Stable) exhibit higher margins and better deleveraging prospects than IDEMIA so have higher leverage allowances for their rating category.

IDEMIA is broadly comparable with the other peers that Fitch covers in its technology and Credit Opinion portfolios. It has slightly higher leverage but benefits from market leadership in its core operating segments, as well as healthy liquidity and global diversification.

## **Rating Sensitivities**

# Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade:

- FFO gross leverage below 7.0x combined with FFO interest coverage of 3x and positive FCF could lead to revision of the Outlook to Stable
- FFO gross leverage below 5.0x combined with profitability improvement and sustained positive FCF generation would lead to an upgrade to 'B+'

# Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade:

- FFO gross leverage sustained above 7.0x, without a clear path for deleveraging, combined with negative FCF
- A material loss of market share or other evidence of significant erosion of business or technology leadership in core operations

## **Liquidity and Debt Structure**

**Satisfactory Liquidity:** At end-3Q20, IDEMIA had long-dated debt maturities, with no material obligation due before 2024. It had EUR164 million of cash and a EUR300 million revolving credit facility (RCF), of which EUR225 million was undrawn at end-3Q20, and its overall liquidity is adequate. We expect liquidity to remain satisfactory as we forecast largely neutral FCF in 2020 (after including disposals) and modest negative FCF in 2021.

### **ESG Considerations**

Unless otherwise disclosed in this section, the highest level of ESG credit relevance is a score of '3'. This means ESG issues are credit-neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. For more information on Fitch's ESG Relevance Scores, visit www.fitchratings.com/esg.

# **Key Assumptions**

## Fitch's Key Assumptions Within its Rating Case for the Issuer

- Reported revenue to decline by 5.5% in 2020 followed by low-to-mid single-digit growth in 2021-2023
- Fitch-defined EBITDA margin at 12.5% in 2020 (pre-IFRS 16), improving towards 16% by 2023, reflecting the impact of efficiency measures and a better business mix
- Capex at around 8% of revenues on average in 2020-2023
- A portion of non-recurring costs treated as recurring in 2020 and all transformation programme costs are reflected above FFO in 2021-2023
- No M&A from 2021

## How to Interpret the Forecast Presented

The forecast presented is based on Fitch Ratings' internally produced, conservative rating case forecast. It does not represent the forecast of the rated issuer. The forecast set out above is only one component used by Fitch Ratings to assign a rating or determine a rating outlook, and the information in the forecast reflects material but not exhaustive elements of Fitch Ratings' rating assumptions for the issuer's financial performance. As such, it cannot be used to establish a rating, and it should not be relied on for that purpose. Fitch Ratings' forecasts are constructed using a proprietary internal forecasting tool, which employs Fitch Ratings' own assumptions on operating and financial performance that may not reflect the assumptions that you would make. Fitch Ratings' own definitions of financial terms such as EBITDA, debt or free cash flow may differ from your own such definitions. Fitch Ratings may be granted access, from time to time, to confidential information on certain elements of the issuer's forward planning. Certain elements of such information may be omitted from this forecast, even where they are included in Fitch Ratings' own internal deliberations, where Fitch Ratings, at its sole discretion, considers the data may be potentially sensitive in a commercial, legal or regulatory context. The forecast (as with the entirety of this report) is produced strictly subject to the disclaimers set out at the end of this report. Fitch Ratings may update the forecast in future reports but assumes no responsibility to do so. Original financial statement data for historical periods is processed by Fitch Solutions on behalf of Fitch Ratings. Key financial adjustments and all financial forecasts credited to Fitch Ratings are generated by rating agency staff.

### **Operating Environment**

aa	Economic Environment	bbb	Average combination of countries where economic value is created and where assets are located.
aa-	Financial Access	aa	Very strong combination of issuer specific funding characteristics and of the strength of the relevant local financial market.
	Systemic Governance	aa	Systemic governance (eg rule of law, corruption; government effectiveness) of the issuer's country of incorporation consistent with 'aa'
b-			
ccc+			

#### Sector Competitive Intensity

bbb		Industry Structure	bb	Highly competitive industry with several companies of comparable size.
bbb-	Т	Barriers to Entry/Exit	bbb	M oderate barriers to entry. Incumbents are generally strongly established but successful new entrants have emerged over time.
bb+		Relative Power in the Value Chain	bbb	Relative bargaining power balanced with suppliers and customers.
bb				
bb-				

#### Company's Market Position

a-		Market Share	bbb	Top-five player in most markets or defensible leader of a niche.
bbb+	Т	Competitive Advantage	bbb	Some competitive advantages with reasonably good sustainability.
bbb				
bbb-	Н			
bb+				

#### **Profitability**

bbb		FFO margin	bbb	9%
bbb-	Т	EBIT margin	bbb	7.5%
bb+		FCF margin	bb	1%
bb	+	Volatility of Profitability	bbb	Volatility of profits in line with industry average.
bb-				

#### **Financial Flexibility**

ı	bbb-		Financial Discipline	bb	Financial policies in place but flexibility in applying them could lead to temporarily exceeding downgrade guidelines.
	bb+	т	Liquidity	bbb	One year liquidity ratio above 1.25x. Staggered debt maturity schedule but funding may be less diversified.
ı	bb		FFO Interest Coverage	b	3.0x
	bb-		FX Exposure	bb	FX exposure on profitability and/or debt/cash flow match. Some hedging in place but only partly effective.
	b+				

How to Read This Page: The left column shows the three-notch band assessment for the overall Factor, illustrated by a bar. The right column breaks down the Factor into Sub-Factors, with a description appropriate for each Sub-Factor and its corresponding category.

#### Management and Corporate Governance

а-		Management Strategy	bbb	Strategy may include opportunistic elements but soundly implemented.
bbb+	т	Governance Structure	bbb	Good CG track record but effectiveness/independence of board less obvious. No evidence of abuse of power even with ownership concentration.
bbb		Group Structure	bbb	Some group complexity leading to somewhat less transparent accounting statements. No significant related-party transactions.
bbb-	Ш	Financial Transparency	bbb	Good quality reporting without significant failing. Consistent with the average of listed companies in major exchanges.
bb+				

#### Sector Trend

a-		Long-Term Growth Potential	bbb	Mature industry. Traditional markets may be under some pressure but opportunities arise in new markets.
bbb+	Т	Volatility of Demand	bbb	Demand fluctuates with economic cycles
bbb		Threat of Substitutes	bbb	Technology risk present, viable alternative technology available in market, moderate switching cost.
bbb-				
bb+				

#### **Diversification**

a-		End-Market Diversification	bbb	Exposure to at least three business lines or markets but with some performance correlation
bbb+	T	Customer Concentration	bbb	Modestly diversified customer base, but no customers representing 10% or more of total revenue.
bbb				
bbb-	ı			
bb+				

#### **Financial Structure**

b		FFO Leverage	000	>6.0x
b-	T	FFO Net Leverage	ccc	>5.5x
ccc+	ı	(CFO-Capex)/Total Debt With Equity Credit	b	5%
ccc	H.	Total Debt With Equity Credit/FCF	ccc	Negative
CCC-		Total Debt With Equity Credit/Op. EBITDA	ccc	>6.0x

S Scale

#### How to Read This Page

ESG scores range from 1 to 5 based on a 15-level color gradation. Red (5) is most relevant and green (1) is least relevant.

The Environmental (E), Social (S) and Governance (G) tables break out the individual components of the scale. The right-hand box shows the aggregate E, S, or G score. General Issues are relevant across all markets with Sector-Specific Issues unique to a particular industry group. Scores are assigned to each sectorspecific issue. These scores signify the credit-relevance of the sector-specific issues to the issuing entity's overall credit rating. The Reference box highlights the factor(s) within which the corresponding ESG issues are captured in Fitch's

The Credit-Relevant ESG Derivation table shows the overall ESG score. This score signifies the credit relevance of combined E, S and G issues to the entity's credit rating. The three columns to the left of the overall ESG score summarize the issuing entity's sub-component ESG scores. The box on the far left identifies the some of the main ESG issues that are drivers or potential drivers of the issuing entity's credit rating (corresponding with scores of 3, 4 or 5) and provides a brief explanation for the score.

Classification of ESG issues has been developed from Fitch's sector ratings criteria. The General Issues and Sector-Specific Issues draw on the classification standards published by the United Nations Priniciples for Responsible Investing (PRI) and the Sustainability Accounting Standards Board (SASB).

#### Social (S)

General Issues	S Score	Sector-Specific Issues	Reference
Human Rights, Community Relations, Access & Affordability	1	n.a.	n.a.
Customer Welfare - Fair Messaging, Privacy & Data Security	3	Data security	Sector Trend; Company's Market Position; Profitability
Labor Relations & Practices	3	Impact of labor negotiations and employee (dis)satisfaction; employee recruitment and retention	Sector Trend; Company's Market Position; Sector Competitive Intensity; Profitability
Employee Wellbeing	1	na.	n.a.
Exposure to Social Impacts	3	Shift in consumer preferences and social trends	Diversification; Sector Trend; Company's Market Position; Profitability

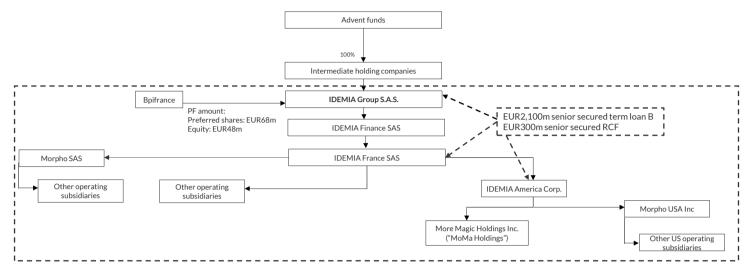

G Score	Sector-Specific Issues	Reference
3	Strategy development and implementation	Management and Corporate Governance
3	Board independence and effectiveness; ownership concentration	Management and Corporate Governance
3	Complexity, transparency and related-party transactions	Management and Corporate Governance
3	Quality and timing of financial disclosure	Management and Corporate Governance
	3 3	3 Strategy development and implementation 3 Board independence and effectiveness; ownership concentration 3 Complexity, transparency and related-party transactions

	How rel	CREDIT-RELEVANT ESG SCALE evant are E, S and G issues to the overall credit rating?
5		Highly relevant, a key rating driver that has a significant impact on the rating on an individual basis. Equivalent to "higher" relative importance within Navigator.
4		Relevant to rating, not a key rating driver but has an impact on the rating in combination with other factors. Equivalent to "moderate" relative importance within Navigator.
3		Minimally relevant to rating, either very low impact or actively managed in a way that results in no impact on the entity rating. Equivalent to "lower" relative importance within Navigator.
2		Irrelevant to the entity rating but relevant to the sector.
1		Irrelevant to the entity rating and irrelevant to the sector.

## **Key Recovery Rating Assumptions**

In conducting its bespoke recovery analysis, Fitch estimates that IDEMIA's intellectual property, patents and recurring contracts, in case of default, would generate more value in a going-concern restructuring than a liquidation of the business.

- We estimate that post-restructuring EBITDA would be around EUR300 million. We
  would expect a default to come from either a fall in revenue and EBITDA from the loss
  of major contracts following reputational damage, for example as a result of
  compromised technology (leading to sustained high leverage and negative cash flow) or
  from a major shift in technology usage that can make IDEMIA's products obsolete.
- We have applied a 6x distressed multiple to post-restructuring EBITDA to account for IDEMIA's scale, customer and geographical diversification as well as exposure to secular growth in biometric-enabled identification technology. The 6x multiple is also around half the valuation paid for Morpho (12.4x), which, in our view, reflects an appropriate distressed valuation.
- 10% of administrative claims have been taken off the enterprise valuation to account for bankruptcy and associated costs, and we assume the company's revolving credit facility is fully drawn, as per our criteria
- EUR40 million of prior-ranking debt at operating subsidiaries included in recovery analysis as IDEMIA's senior secured term loan B (TLB) and RCF are structurally subordinated to debt at its operating subsidiary
- Our recovery expectation for senior secured lenders of the TLB and the RCF is 66% (in line with an 'RR3' recovery rating), leading to a one-notch uplift for the senior secured debt rating at 'B+'.

# B+/B/B-/CCC Table

Considerations	B+	В	B-	CCC+	CCC	Trend	Fitch's view
Business model	Robust	Sustainable	Intact	Redeemable	Compromised	<b>•</b>	IDEMIA's business profile benefits from structural growth in demand for trusted identities, offsetting softness in more traditional markets (such as SIM cards and bank cards). The business has large scale, geographical diversification and some pricing power due to high barriers to entry. The group has around 50% revenue exposure to public sector contracts, which should provide a more sustainable stream of revenue.
Strategy/ execution risk	Limited	Moderate	Meaningful	Challenging yet achievable	Uncertain	<b>•</b>	IDEMIA is constantly investing in product innovation to maintain technology leadership. They are not chasing market share at the expense of profitability in difficult markets. The synergies plan is credible and should be largely achieved.
Cash flow	Consistently positive	Neutral to positive	Volatile	Mostly negative	Constantly negative	•	IDEMIA had volatile FCF in the past three years, mainly due to restructuring items. We expect FCF to return to positive on a sustained basis from FY21 (year-end December) onwards as synergies from the integration of Morpho as well as cost-optimisation efforts materialise.
Leverage profile	Clear deleveraging path	Deleveraging capacity	High but sustainable	Significant outlier	Unsustainable	•	Current leverage is high but likely to reduce over time from better operating performance. According to our rating case, FFO leverage should decrease to below the downgrade threshold by 2022.
Governance and financial policy	Committed	Some commitment to deleveraging	Aggressive	Ineffective	Uncommitted	<b>•</b>	At the initial transaction, Advent signaled a willingness to delever towards 4x. No historical dividends have been paid and there is no intention to pay dividends in the near term. M&A, if any, should be disciplined.
Refinancing risk	Limited	Manageable	High	Off-market options	Excessive	<b>(</b>	According to our rating case, FFO leverage should be around 6.7x by 2022, one year before the reimbursement of the TLB, making refinancing risk manageable.
Liquidity	Comfortable	Satisfactory	Limited	Minimal headroom	Poor/partly funded	<b>(</b>	IDEMIA has minimal short-term debt requirements, so cashon balance sheet is adequate. Liquidity is enhanced by a EUR300 million committed RCF, of which EUR225 million was undrawn at end-3Q20.
Conclusion	B/Negative
