## IDEMIA Group

### Update to credit analysis

#### Summary

IDEMIA Group's (IDEMIA) B3 corporate family rating (CFR) remains weakly positioned in its rating category, reflecting the company's high Moody's-adjusted (gross) leverage of 9.1x as of 31 December 2020 and negative Moody's-adjusted free cash flow (FCF) of around €60 million in 2020. Although we forecast an improvement in IDEMIA's financial metrics over the next 12-18 months, with Moody's-adjusted leverage improving towards 7.5x by December 2022 and Moody's-adjusted FCF/debt approaching break-even, such an improvement is highly dependent on a recovery in revenue, tight cost control and a reduction in nonrecurring items, all of which are subject to uncertainty and execution risk.

The B3 CFR is also constrained by the company's relatively limited recurring revenue and a lack of visibility in certain business lines, given the unevenness of new contracts and renewal cycles; as well as technological risks inherent in its business model. These factors are partly offset by the high barriers to entry in IDEMIA's various business lines; the company's strong market share in its key segments; its good geographical and customer diversification; and its adequate liquidity, which includes a €171 million cash balance and a €300 million undrawn revolving credit facility (RCF), both as of 31 December 2020.

The negative outlook reflects the execution risk associated with a future improvement in IDEMIA's financial metrics. We could change the outlook to stable if the company were to successfully improve its financial performance, such that its leverage decreases and its FCF turns positive on a sustained basis.

#### Exhibit 1

##### Moody's expects IDEMIA's high leverage will improve over the next 12-18 months Moody's-adjusted debt/EBITDA

2021F and 2022F figures are based on our assumptions and forecasts.

Source: Moody's Investors Service

## Credit strengths

- » Strong market position in key segments such as payment cards, and identity and security solutions
- » High barriers to entry, given the need for technological know-how, and a track record of delivery and performance
- » Good customer and geographical diversification

## Credit challenges

- » Relatively limited recurring revenue and lack of visibility into the performance of certain business lines, given the unevenness of new contracts and renewal cycles
- » Execution risk associated with achieving an improvement in revenue, profitability and cash flow, in the context of a mixed financial track record
- » High Moody's-adjusted leverage of 9.1x as of December 2020 and consistently negative FCF

## Rating outlook

The negative rating outlook reflects the execution risk associated with IDEMIA's future revenue and EBITDA growth, a reduction in its nonrecurring items on a sustained basis, and its leverage reduction and cash flow generation potential in general. We could change the outlook to stable if IDEMIA's revenue and EBITDA performance were to improve materially in 2021-22 while the company significantly reduces its nonrecurring items, such that its leverage decreases and its FCF turns positive.

## Factors that could lead to an upgrade

Because of the weak rating position at present, an upgrade is unlikely but could occur over time if IDEMIA returns to significantly positive top-line growth; reduces and maintains its Moody's-adjusted leverage below 6.0x; generates significant positive FCF on a sustained basis; and maintains adequate liquidity.

## Factors that could lead to a downgrade

We could downgrade IDEMIA's rating if the company fails to reduce its Moody's-adjusted leverage because of, among other factors, revenue strain or a failure to deliver cost synergies; or its FCF remains negative to a larger extent or for a longer period than we expect, impairing the company's liquidity.

## Profile

Headquartered in Paris, IDEMIA is an international group that develops, manufactures and markets specialised security technology products and services mainly for identity and public security, payments, telecommunications and automotive markets. The group has

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the ratings tab on the issuer/entity page on [www.moody's.com](http://www.moody's.com) for the most updated credit rating action information and rating history.

been majority-owned by funds controlled by Advent International since November 2011, when the private-equity sponsor purchased Oberthur for €1.1 billion (or company-adjusted EBITDA of 9.1x in 2011). Oberthur subsequently completed the acquisition of Safran's identity and security business, Morpho, on 31 May 2017 for a total consideration of €2.4 billion (or company-adjusted EBITDA of 11.9x in 2016). As part of the Morpho acquisition, Advent International was joined by BpiFrance as a minority investor. IDEMIA is the new brand name for the Oberthur-Morpho venture.

IDEMIA generated revenue of €2.2 billion and company-adjusted EBITDA of €362 million in 2020. The company is organised along two internal reporting lines: Secured Enterprise Transactions (key products include payment cards, mobile money solutions, SIM cards, embedded secure elements for mobile phones and tablets, and access cards for digital television) and Government Solutions (products include identity solutions, public security, and biometric and document identification). Revenue was split almost evenly between the two divisions in 2020, according to company reporting.

## Detailed credit considerations

### Strong market positions across a number of verticals

Size is very important in the industry, with economies of scale essential to remaining competitive as products mature. The acquisition of Morpho was transformational for the company as it consolidated its market positions in several verticals and improved its diversification by adding a new security vertical with a market leading position.

Today, IDEMIA is a leading player in the payment card and telecom SIM card markets, which together form the company's Secured Enterprise Transactions business line, alongside Gemalto N.V. (Gemalto), the global leader owned by Thales (A2 negative).

IDEMIA is also a global leader through its Government Solutions business line, with a world-leading biometric identity and security businesses that compete with companies such as Gemalto/Thales, NEC Corporation, Vision-Box SA and Suprema Inc.

### Limited number of companies, particularly in payment, identity and security product lines, reflecting the high barriers to entry

IDEMIA enjoys strong market positions in its key verticals (Secure Enterprise Transactions and Government Solutions), which are defensible because of the high barriers to entry. The digital security industry demands high reliability. Payment smart card manufacturers need to obtain restrictive certifications required by their customers and demonstrate an ability to process significant amounts of highly sensitive data. Similar certifications are required for identity and security contracts with public-sector customers.

We view the company's long track record of operations in its core industries, with a diversified portfolio of long-standing blue-chip customers, as positive. In its Secured Enterprise Transactions vertical, IDEMIA's clients include more than 1,200 multinational financial institutions. The critical nature of digital security products and related services for banks and governments supports trusted long-standing relationships with clients, leading to limited customer churn and favouring well-established companies.

The company's size and global footprint allow for economies of scale in a market driven by a large volume of shipments, delivery, reactivity and full-service provision to customers with global operations. IDEMIA's operations are supported by a global manufacturing and service centre network in 60 countries, offering secure devices and delivering documents in 140 countries, 11 manufacturing sites built around five key regional hubs, and 39 secure service centres. These underpin IDEMIA's global competitiveness because they allow for local personalisation and delivery reactivity, enhanced confidential data management and customer service.

### Highly diversified portfolio of customers

IDEMIA benefits from a diversified portfolio of long-standing blue-chip customers, including more than 1,200 multinational financial institutions, 400 mobile operators and 100 government entities. Following the acquisition of Morpho, the company has a customer portfolio that is more balanced between public- and private-sector markets. While, on a standalone basis, Oberthur generated most of its revenue from corporates, including financial institutions and mobile operators, Morpho's business identity and security business was geared towards public-sector clients. No single client accounts for more than 3% of the group's sales, although there is a higher degree of customer concentration within certain subsegments because of its reliance on big-ticket contracts.

### Limited recurring revenue and lack of visibility into the performance of certain business lines

The acquisition of Morpho in 2017 was expected to increase the group's exposure to growth markets and improve its recurring revenue and overall revenue visibility. Morpho's security business, which was incorporated into Government Solutions, was considered fast

growing and, therefore, was likely to mitigate the revenue constraints arising from the telecom subsegment, excess inventory in the banking card segment and volatility in identity solutions. In reality, the Government Solutions division has underperformed compared with our expectations and has proved to be a somewhat uneven source of revenue. This, in combination with a certain degree of volatility in the payment solutions business line, reduces visibility into IDEMIA's future top line.

### **Innovation has enabled the company to maintain its competitive position, but technological risk is high**

We view positively IDEMIA's track record in developing products and services that respond to the evolving needs of customers. However, IDEMIA's technological risk is high because the company must not only innovate but also monetise its technological solutions and ensure that the adoption of new technologies provides the same economies as those they replace.

For example, we expect the adoption of the embedded SIM (eUICC/eSIM) technology in mobile handsets, instead of physical SIM cards, to occur over the next three to five years. The exact impact of the adoption of the eSIM technology on IDEMIA's top line is difficult to model. The widespread adoption of eSIM technology could lead to a shift in IDEMIA's customer base from more than 200 mobile operators to a handful of global handset makers. In addition, IDEMIA could have new competitors who do not operate in the physical smart card market. However, the impact of such developments on IDEMIA is likely to be mitigated by the reduced importance of telecom solutions following the acquisition of Morpho; the fact that the eSIM technology could be limited to developed countries, which account for a relatively modest proportion of the company's annual shipments; and IDEMIA's inclusion of virtual SIM card in its product portfolio.

Technological or substitution risk applies to payment cards to a smaller extent. The latest technologies to be implemented in the payment industry include mobile payment, which enables payment through smartphones because of local (near-field communication) connectivity. Although this innovation is likely to reduce card usage, in particular, because of lower wear and tear, and loss, we do not believe, at this stage, that the physical payment card will be fully substituted.

### **Significant growth is required to improve the company's financial metrics following the setback caused by the coronavirus pandemic in 2020**

IDEMIA's financial track record has been mixed. Although its financial performance was weak in the first two years following the Morpho acquisition, marked by declining revenue, limited growth in profitability, very large exceptional items and highly negative FCF, IDEMIA achieved an improvement in several key metrics in 2019 as the company, led by a new management team, outperformed our expectations.

Unfortunately, the pandemic exerted renewed pressure on the company's financials in 2020, with its revenue declining 6% year on year and its company-adjusted EBITDA decreasing to €362 million in 2020, from €397 million a year earlier. IDEMIA's Moody's-adjusted EBITDA also fell to €247 million, from €299 million, over the same period.

It is crucial that IDEMIA reestablishes the growth momentum achieved in 2019, and we believe that the impact of the pandemic on the company's financial performance will prove temporary. Going forward, we expect revenue growth to improve towards 3%-4% per year, which, in combination with tight cost control, which will drive an improvement in company-adjusted EBITDA towards €385 million in 2021 and €405 million in 2022. As a result, we forecast the company's Moody's-adjusted EBITDA (which reflects our adjustments for items including exceptional costs and capitalised development costs) will improve towards €275 million and €300 million in 2021 and 2022, respectively. That said, we highlight that significant execution risk exists.

A key metric that requires focus and improvement is IDEMIA's Moody's-adjusted FCF, which remained negative at €60 million in 2020. The company's historically negative FCF is likely to continue, but at a more reduced pace, on the back of revenue and EBITDA growth, with its Moody's-adjusted FCF approaching break-even on a sustained basis by 2023 according to our forecasts.

### **Leverage will improve over 2021-22, but will remain high**

IDEMIA's Moody's-adjusted leverage increased significantly to 9.1x as of 31 December 2020, from 7.6x a year earlier, mainly because of the impact of the pandemic. We expect the company to reduce its leverage towards 8.2x and 7.6x in 2021 and 2022, which, however, will remain at the high end of the range for the company's B3 CFR.

Source: Moody's Investors Service

**ESG Considerations**

IDEMIA is tightly controlled by Advent International which, as majority owner, controls the board. As is often the case in highly levered, private equity sponsored deals, owners have a high tolerance for leverage/risk and governance is comparatively less transparent. That said, the rating agency also highlights that, following the appointment of new management, the company has significantly improved its transparency and financial disclosure. Moody's has factored these considerations into its assessment of the credit risk associated with IDEMIA.

**Liquidity analysis**

IDEMIA has adequate liquidity. Although its Moody's-adjusted FCF was significantly negative at €60 million in 2020, the company preserved its liquidity by raising cash proceeds from asset disposals. As a result, IDEMIA's liquidity amounted to €470 million as of 31 December 2020, which included €170 million of cash and a fully undrawn €300 million RCF. We expect these sources to be sufficient to absorb the cash outflow related to negative FCF that we project over the next 12-18 months. The RCF has a springing leverage covenant, tested only when 35% of the facility is drawn. If tested, the maximum net leverage is set at 7.8x, compared with a pro forma net leverage ratio of 4.1x as reported by the company as of December 2020.

IDEMIA recently extended most of its €2.0 billion equivalent term loan B and €300 million RCF. More specifically, the company extended the maturity of its €1,385 million and \$655 million term facilities to January 2026, from January 2024, and the maturity of its RCF to July 2025. Only a \$75 million portion of the term loan remained unextended and is due January 2024.

**Structural considerations**

IDEMIA's probability of default rating (PDR) of B3-PD is aligned with its CFR, reflecting our assumption of a 50% family recovery rate, in line with our practice for covenant-lite all-first-lien loan capital structures. The senior secured term loan and senior secured RCF rank pari passu and are both rated B3, in line with the CFR and reflecting the absence of any significant liabilities ranking ahead or behind.

The senior secured facilities benefit from guarantees equivalent to a minimum of 80% of the company's EBITDA and gross assets. The security package includes share pledges, along with pledges over bank accounts and intercompany receivables, which we consider fairly weak. The shareholder loans and preferred shares used in the post-acquisition capitalisation of the company are not included in the debt structure as they meet our criteria for full equity treatment.

**Methodology and scorecard**

The principal methodology used in this rating was the [Global Manufacturing Companies](#), published in March 2020.

The one-notch difference between the scorecard-indicated outcome and the actual rating assigned reflects the level of IDEMIA's negative FCF and the significant execution risk associated with the company's overall financial performance over the next 12 to 18 months.

MOODY'S adopts all necessary measures so that the information it uses in assigning a credit rating is of sufficient quality and from sources MOODY'S considers to be reliable including, when appropriate, independent third-party sources. However, MOODY'S is not an auditor and cannot in every instance independently verify or validate information received in the rating process or in preparing its Publications.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability to any person or entity for any indirect, special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information, even if MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers is advised in advance of the possibility of such losses or damages, including but not limited to: (a) any loss of present or prospective profits or (b) any loss or damage arising where the relevant financial instrument is not the subject of a particular credit rating assigned by MOODY'S.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING, ASSESSMENT, OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay to Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it fees ranging from \$1,000 to approximately \$5,000,000. MCO and Moody's Investors Service also maintain policies and procedures to address the independence of Moody's Investors Service credit ratings and credit rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at [www.moody.com](http://www.moody.com) under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any credit rating, agreed to pay to MJKK or MSFJ (as applicable) for credit ratings opinions and services rendered by it fees ranging from JPY125,000 to approximately JPY550,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
